B. Crossword

ACROSS

- 1 Can be detected to assess protein protein interactions in bacterial two-hybrid system
- 5 Acts as a warhead for serine hydrolases
- 7 A yeast protein known to homooligomerise
- 8 Integration of various techniques in proteomics

DOWN

- 2 This is added to aid in deprotonation during mass spectrophotometry
- 3 Sinapinic acid is used as a solvent in MALDI due to the presence of groups
- 4 DMSO is used as an aprotic solvent in ESI to increase
- 6 A E.coli repressor often used in Yeast two-hybrid assay
