### 2.3 Objectives:

1. The main objective of this proposal is to convert the UDSC-BSL3 facility, till now being funded by an independent research grant, into a national facility for Tuberculosis work involving virulent mycobacteria and aerosol challenge of experimental animal, which would be available to various TB investigators across the country thereby benefiting and providing advancement to TB research.
2. To ensure a continuous long-term maintenance of UDSC-BSL3 in a fully functional manner that would in turn assure an uninterrupted access of the facility for mycobacterial research to various TB related research labs in the country.
3. To provide services to use the UDSC-BSL3 containment facility to various TB investigators across the country for carrying out in vitro work and tissue culture work
4. To provide services to use the animal holding room and the aerosol challenge facility located in the UDSC-BSL3 facility to various TB investigators across the country for carrying out infection studies in animal models.
5. To provide services in project mode to various private companies for the following research proposals:
  - Generation of mycobacterial mutants
  - Evaluation of candidate drugs for the inhibition of M. tuberculosis in vitro, intraphagosomal and in animal models
  - Evaluation of the protective efficacy of candidate vaccines in guinea pig and mice model of experimental tuberculosis
6. To provide hands on training opportunities to various academic and private labs (faculties/students/scientists) for the development of skilled and quality manpower to work in containment facilities using pathogenic M. tuberculosis.
